

# KS 500-45 Brown

## Product Data Sheet

### Description:

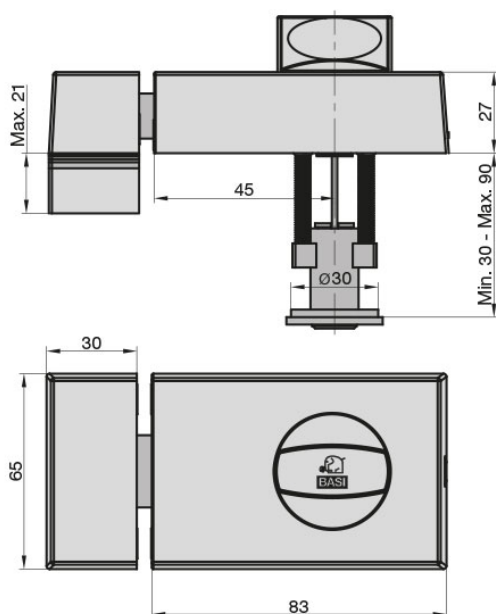

The rim lock KS 500 with a solid bolt offers effective protection against burglary for doors opening inwards. In addition to the door lock, the entrance door is additionally protected against attacks from the outside with this additional box lock, which is fitted on the inside. It can be used on both the right and left sides. In addition, the rim lock is prepared for profile rim cylinders; and this rim cylinder is not included in the scope of delivery.

- turn knob on the inside for locking and opening
- with solid bolt (1 turn)
- including frame dowel screw
- lock case: square / locking unit: 83 mm / backset: 45 mm
- colour: brown
