

4KS. More robust. Stronger. More secure

You can always rely on 4KS. Thanks to its high level of resilience, the system also locks and unlocks in the toughest conditions. Even after years, it works like on the first day. This makes 4KS your first choice for the toughest conditions – at high altitudes or in production facilities subject to high amounts of dirt. And not just that. 4KS also offers extensive expansion capabilities, which enables the implementation of highly complex locking systems.

The benefits of 4KS at a glance

- › Resilient and extremely durable
- › For master key systems with a highly complex structure
- › Springless technology
- › Patent protection until 2037 at the latest*

* according to EP3426865

For country-specific patent protection, see worldwide.espacenet.com

4KS. One system, many details

Unlike other locking systems, the locking elements in the 4KS cylinder move along the curves on the key. A total of 12 springless, massive locking pins are brought into a specific position via positive control of the six key curves and scanned by two control bars. As a result of the key's overlapping curve milling it is virtually tamper-proof.

Practical, handy and appealing

Optionally, 4KS keys are available in a range of colours. The colour coding helps to easily distinguish between keys.

All-round protection

Copy keys, additional cylinders and locking charts are available from authorised EVVA Partners and only with corresponding proof of legitimacy, EVVA security cards.

Benefit from the security features

The reliable technology of the 4KS cylinder offers lasting protection against illegal opening methods:

Drilling protection

Plug pulling protection

Unique EVVA service

Since 1919, EVVA services have been focused on customer benefits. This has resulted in market-based products, the best product and consulting service as well as an outstanding locking system expertise.

Locking systems by professionals

Master key systems define who has access to which facilities. EVVA provides comprehensive master key system and access control system expertise as well as high-performance locking systems.

Mechanical and electronic locking systems

EVVA is one of the few manufacturers that develops and produces electronic and mechanical locking systems in Vienna. EVVA's electronic and mechanical products can be combined in locking systems around the world depending on customer demands.

Excellent advice

EVVA is your reliable partner. Be it for technical queries concerning EVVA products or planning issues regarding a project, you can always count on EVVA.
